

Colouring Tincture

Special Characteristics

Light-fast and transparent.

For coloring CLOUCRYL Clear Lacquers

Technical Data

Tint colorless varnish according to the desired colour intensity with 0.5 – 5% Coloring Tincture.

Do not spray the tinted varnish onto untreated wood but only onto primed, sanded and dusted surfaces

(a normal cross coat; 1.5 – 1.8 mm nozzle; 2.5 – 3.0 bar).

Special Instructions

The resulting colour shade is very much dependent on the thickness of the applied coat and the wood's own colour.

Therefore always make a test sample first.

Refer to the technical data sheet for further information.

Storage/disposal

Highly flammable.

Irritating to eyes and respiratory system.

Repeated exposure may cause skin dryness or cracking.

Vapors may cause drowsiness and dizziness.

Avoid contact with skin and eyes.

Do not empty into drains.

Take precautionary measures against static discharges.

If swallowed, seek medical advice immediately and show this container or label.

Use only in well-ventilated areas.
