

Product Characteristics

- quick adhesion
- good adhesion on moist surfaces, after drying endures even seawater
- non-corrosive, solvent less, odourless and isocyanic acid free
- replaces traditional assembly glues and acrylic sealant, silicone, polyurethane, window butty and butyl sealant
- suitable for gluing covering boards, mouldings, boards, pipes and fittings e.g. at home, cottage, car and boat
- elastic glued joint
- for indoor and outdoor use
- basic amount element flextex-hybridipolymer
- composition paste

Field of use

- wood
- brick
- metal
- stone
- fibre board
- polystyrene
- concrete
- plastic
- tile
- glass
- mirror
- not suitable for PP, PE, PFTE

Technical Data

Resource base: saline netting polymer, solvent-free

Processing temperature: 5° C to 40° C

Temperature resistance: 30° C to 80° C to 100° C short term

Open time: 15 minutes

Bridging capacity: up to 20 mm

Tack: about 8 g / cm³

Full strength: 3.0 to 3.6 N / mm²

Elongation at break (DIN 53504): 300%

Curing time: 2 mm/24 hours

Resistance: resistant to aging, weathering as well as moisture-resistant

Capacity: 300 ml

Available colours: transparent, white, wood tone
